Profile

- Software developer with 4 years of experience in **React Native, Reactjs, Nextjs, Nestjs, Flutter, Java, Kotlin, JavaScript, Tailwind CSS, Python, PowerBI**.
- Skilled in integrating various CRMs, including **Zoho Creator, Salesforce**.
- Experienced in developing applications ranging from small-scale to complex, enterprise-level solutions.
- A lifelong learner with a growth mindset and the ability to thrive in fast-paced team environments.

Experience

07/2021 – Present
Pakistan

Genetech Solutions - Software Developer
Pakistan

- Implemented complex mobile and web applications using **React.js, Nextjs** for web and **Flutter, React Native, Java, and Kotlin** for mobile platforms.
- Worked with **microservices architecture** and utilized **RabbitMQ** as a message broker for efficient inter-service communication.
- Hands-on experience with **Docker containerization**, deploying applications efficiently on **Firebase**.
- Designed and deployed solutions on **Microsoft Azure** using **Azure Data Studio**.
- Provided technical support and resolved issues promptly for both web and mobile applications.
- Familiar with **component-based architecture** and **reusable UI components** to ensure scalable design.
- Integrated third-party libraries and services, including **payment gateways** and **social media APIs**, in both web and mobile applications.
- Implemented **SSL certificate management** and **deep linking** in mobile applications.
- Experienced in publishing applications to both the **Google Play Store** and **Apple App Store**.
- Adept at implementing **state management solutions** and optimizing app performance for **scalability and reliability**, using **GetX** for Flutter and **Redux/Context API** for React Native.
- Proven ability to work in **agile development environments**, delivering high-quality features on time.
- Skilled in developing and consuming **RESTful APIs** in both web and mobile applications.
- Implement **Google** Wallet and **Apple** Wallet pass integration in the project.
- Implement webhook integration to connect and sync data with the **CRM**(Salesforce) system.

03/2021 – 06/2021
Pakistan

Quatorze - React Native Developer
Pakistan

- Developed and maintained **mobile applications** using **React Native**, ensuring adherence to best coding practices and efficient **UI/UX design**.
- Integrated **Firebase** for real-time tracking and data synchronization using **Firestore**, and implemented **push notifications** to enhance user engagement.
- Implemented complex business logic by consuming and integrating **RESTful APIs**.
- Managed backend processes, including **database upgrades**, schema migrations, and system optimizations.

Education

2023 – 2024 **Masters in Data Science**
NED University of Engineering and Technology
3.1 CGPA

2018 – 2021 **Bachelor of Computer Science**
University of Karachi
2.7 CGPA

2017 – 2018 **Intermediate**
Fatimiyah Boys College
A Grade

2016 **Secondary School Certificate**
Albatross Grammar School
A Grade

Technical Worksheet

Programming Languages
Nestjs, Nextjs, Nodejs, JavaScript, Typescript, React Native, Flutter, Python, Reactjs,

Development Tools & IDEs
Visual Studio, Sublime Text, Android Studio, Xcode, Google Colab, Jupyter notebook/anaconda3;

Web-Related
Reactjs, Nextjs JavaScript

Office Management
Zoom, MS Teams

Other
Rest APIs, Article on medium related to Deep Linking in Flutter

Database Related
Mysql, postgresql, Mongodb, Sqlite, Firebase

Version Control
Git

Operating Systems
Windows, Mac

Development Methodologies
Waterfall Methodology, Agile Methodology

Projects

Enrich Kids
A marketplace platform built with Nextjs and Nestjs, connecting parents with various physical courses for children, including karate, football, and summer camps. Parents can easily create accounts, enroll their children in activities, and promote skill development through accessible, engaging courses.

OneID Platform
A oneID census and management platform built with Nextjs and Nestjs that collects data through software based online forms and OCR-processed physical forms for accurate digitization. It also manages member profiles, identity cards, and global & location-based directories of businesses and offers.

Tradefindry
TradeFindry is a powerful iOS application for designers. It allows them to search for products from different vendors and create their own design boards. The app is a React Native iOS-based app using REDUX, Async Storage, and Firebase Push Notifications.

Hey Smarty
An advanced AI-powered mobile app similar to ChatGPT, designed for intelligent responses to user queries. The app features speech-to-text, voice-to-voice, dark and light themes, and font resizing. Users can log in securely using Google, Apple, or custom sign-ins. HeySmarty also supports categorizing chats, saving them locally, and creating custom folders for the organization.

AI PhotoBooth
This custom photo booth app turns selfies into 2D AI-generated avatars. Users get three unique avatar options, and businesses receive valuable customer details like emails and phone numbers.

Islamic Library
Developed a full-stack Islamic Library application using NestJS, Next.js, and Flutter, enabling users to read and download books seamlessly, implemented key features including favorites, PDF annotations (notes and snapshots), and a comprehensive review and rating system for enhanced user engagement.

Multi Timer Stopwatch
The Multi Timer Stopwatch app creates and runs multiple countdown timers simultaneously. In Multi Timer, you can create timers and use voice commands to start, stop, and pause them. Users can also organize timers in a group so that they run sequentially. It also provides a notification for the active timer.

TeeSquare
TeeSquare app is a socially purposed EdTech enterprise dedicated to providing affordable, empowering, and inclusive quality education in Pakistan. Technology-wise, it is a native Android app with a Java and Kotlin mixed codebase. The database, uses the Room persistence library, Retrofit Client, and it built my expertise in debugging skills.

ZOHO Creator Applications
Worked extensively on a suite of interconnected applications built using Zoho Creator. Each application was designed to serve a specific business function, yet seamlessly integrated with others through external lookups, shared forms, and cross-application workflows. This modular architecture allowed us to maintain clean data structures while enabling dynamic data flow between systems.
